Saskatoon

Summary

Experienced Full stack developer specializing in web apps built with PHP/Nodejs, and mobile apps using Ionic and VueJS.

Current Learning; GoLang and more (cloud, microservices)

Experience

OFAS - Online Form Automation System

Full Stack & Mobile Developer

September 2019 - Present (1 year)

Canada

- My duties are to write backend services and to implement the front-end components of a software as service (SaaS) to streamline the Canadian immigration firms' process. Also, I have integrated some of the 3rd party systems which are Stripe, Zoom Meeting, and Cronofy.
- Tech Stacks; VueJS with Vuetify, RESTful services with ExpressJS, Firebase, Postgres and AWS. Mobile app is Vue, Ionic and Capacitor.

Modiw Soft Co.,Ltd.

Mobile & Full Stack Developer

September 2017 - September 2019 (2 years 1 month)

Mongolia

- Mobile Applications; Ionic Vue Cordova
- Front-end; VueJS, Vuetify, Firebase, Bootstrap, UIKit
- Backend: NodeJS / ExpressJS, Laravel, CakePHP

Ecocapital NBF1

Technical Lead & Full Stack Developer

January 2014 - September 2017 (3 years 9 months)

Mongolia

- I developed a web based application for Non Banking Financial Institution in Mongolia. I was directly reporting to the CEO of the company.

- My responsibilities were system analysis, designing the database and system architecture, writing core applications, reviewing the code, and providing tasks to developers.
- As a result of streamlining the process of the loan, we reduced the loan application process time by 70%.
- I was maintaining the system from 2017/09 - 2019/09.

Tech stacks

- Vuejs, Vuetify
- Mobile app is Ionic Framework
- ExpressJS / RESTful service
- Node-Cron
- Postgresql / Materialised views, Calculation interest
- OS: Ubuntu Server with Linode VPS

Modiw Soft Co.,Ltd.

Senior Software Developer

April 2008 - February 2014 (5 years 11 months)

Mongolia

- I was one of the first members in the IT department of the company that was founded in 2007. My duties were to develop an enterprise content management system, to lead a team and bring new technical solutions.
- I had done outsourcing projects related to web development and its components from Japan. In addition to this, I had successfully developed a lot of software projects such as websites, e-commerces, mobile web sites, web based apps, and custom applications. I was working a subcontract developer Between 2017 - 2019 .

- Used Technologies;

Frontend: JavaScript, ES5, HTML & CSS / SASS, Bootstrap, Angular, VueJS/ Vuetify(since 2016)

Backend: PHP/CakePHP and Laravel, NodeJS/ExpressJS
